

ONSITETM

PORTABLE SPILL CONTROL

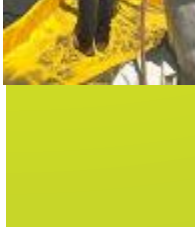

ONSITE Portable Spill Control Systems are made exclusively for small commercial and residential construction. *ONSITE* keeps wastewater runoff, aggregates and fluids out of storm drains, streets, and curb and gutter systems.

ONSITE is reusable, lightweight, durable, and can be deployed in under 30 seconds! *ONSITE* is your answer to portable **TOTAL CONTAINMENT!**

- *ONSITE* is easy to carry!
- Fits in just about any work truck!
- Unfolds and folds up in minutes!
- Fits easily into most curb and gutter systems!

Constructed of durable, high strength PVC sheeting, *ONSITE* is approved for water and sediment discharge containment. These units are lightweight, durable, and reusable. Available in “safety yellow” for high visibility. *ONSITE* can be ordered in four sizes, 6x6, 8x8, 8x8 Heavy Duty, and 10x8 Heavy Duty. Our units are constructed with a single sheet barrier to provide a “full seal” containment vessel.

ONSITE is built to comply with the NPDES requirements of the EPA Sec 40, CFR 122.26 mandate 1999. This product is also pending approval of the California State Water Resources Board for environmental runoff and storm drain control.
